

TECHNICAL INSTRUCTION (NAVSEA TEMPLATE)

Ref: (a) NAVSEA 5252.242-9115 (TECHNICAL INSTRUCTIONS)

Enclosure (if applicable): []

This Technical Instruction (TI) is issued pursuant to reference (a) from my capacity as the Contracting Officer's Representative (COR) for the contract/order identified below. This TI is issued with the understanding that implementation is within the present scope of the contract/order and that it does not change the statement of work or other terms and conditions. Nothing herein should be construed as amending the subject contract/order or as changing any contractual requirements. If the contractor believes that compliance with anything herein would constitute a change in the requirements of the subject contract/order, the contractor should not accept the TI and notify the Procuring Contracting Officer (PCO), in writing, within ten (10) working days, specify the reason(s) for such belief, and take no further action. A copy should also be sent to the COR.

Note: The contractor shall inform the COR, in writing, when 75% of the costs allotted to this TI have been expended. Expenditures for this TI shall not exceed the allotted amount. This TI is contingent upon the availability of funds and performance shall not commence until funding has been obligated on the contract/order.

	<p>being integrated and tested in a system/sub-system environment at a later date. Some of these components will require equipment monitoring during testing.</p> <ol style="list-style-type: none"> 2. Coupon-level testing of specific materials in support of target vulnerability module development and to further validate the current models. Materials will be tested over a variety of conditions and parameters; this way, material data can be leveraged over multiple targets and engagement conditions. Variable test parameters include engagement angle, airflow speed, irradiance, sample preparation, etc. 3. Assist in full test target acquisition and work up targets to prepare them for static and dynamic test events; Operation and monitoring of test components for failure during testing will be required 4. Assist in any field tests that may be conducted involving dynamic systems or components of applicable targets 5. Prepare test/data analysis reports as required and support technical meetings, video/teleconferences, workshops, etc. in support of the SSL Lethality IPT 6. Assist in the establishment of the HEL Lethality test laboratory, to include mechanical, electrical, plumbing, etc. support for required laser equipment, laser support equipment, diagnostics, etc (for example, hard wiring of chillers, lasers, blowers, exhaust. Work will include purchasing the necessary equipment to complete all tasks.
